

Understanding Information-Seeking Behavior of Social Scientists

Meet the Experts – GESIS online talks

*Knowledge technologies for the Social Science: Access to Social Science Data
and Services*

Dr. Dagmar Kern, 18.1.2024

Overview

- What is information-seeking behavior?
- Why is it important to understand it?
- How to research information-seeking behavior?
- How can the identified information-seeking behavior be used to support users?
- Will information-seeking behavior change in the future?

What is Information Seeking Behavior?

Definition: Information-Seeking

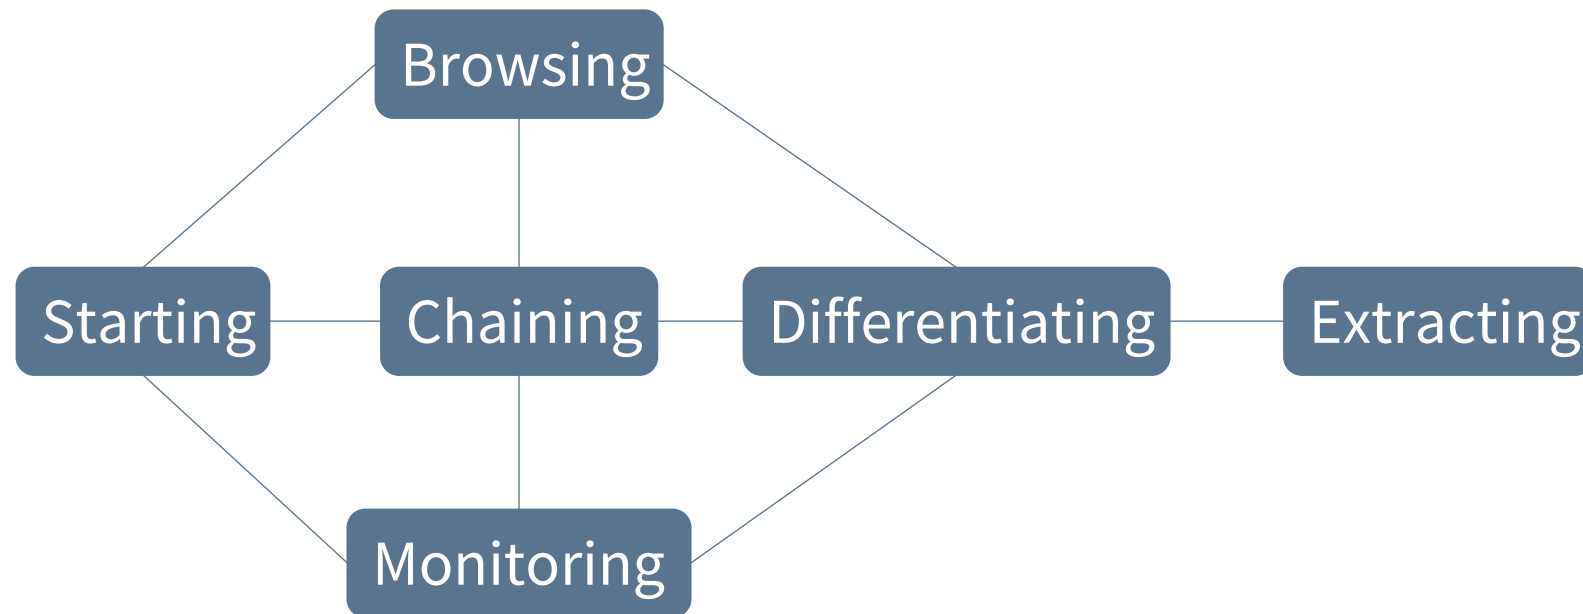

“The user’s constructive activity of finding meaning from information in order to extend his or her state of knowledge on a particular problem or topic.”

(Kuhlthau, 1991)

designed by  freepik

Ellis' Information Seeking Model (1993)

Web Search

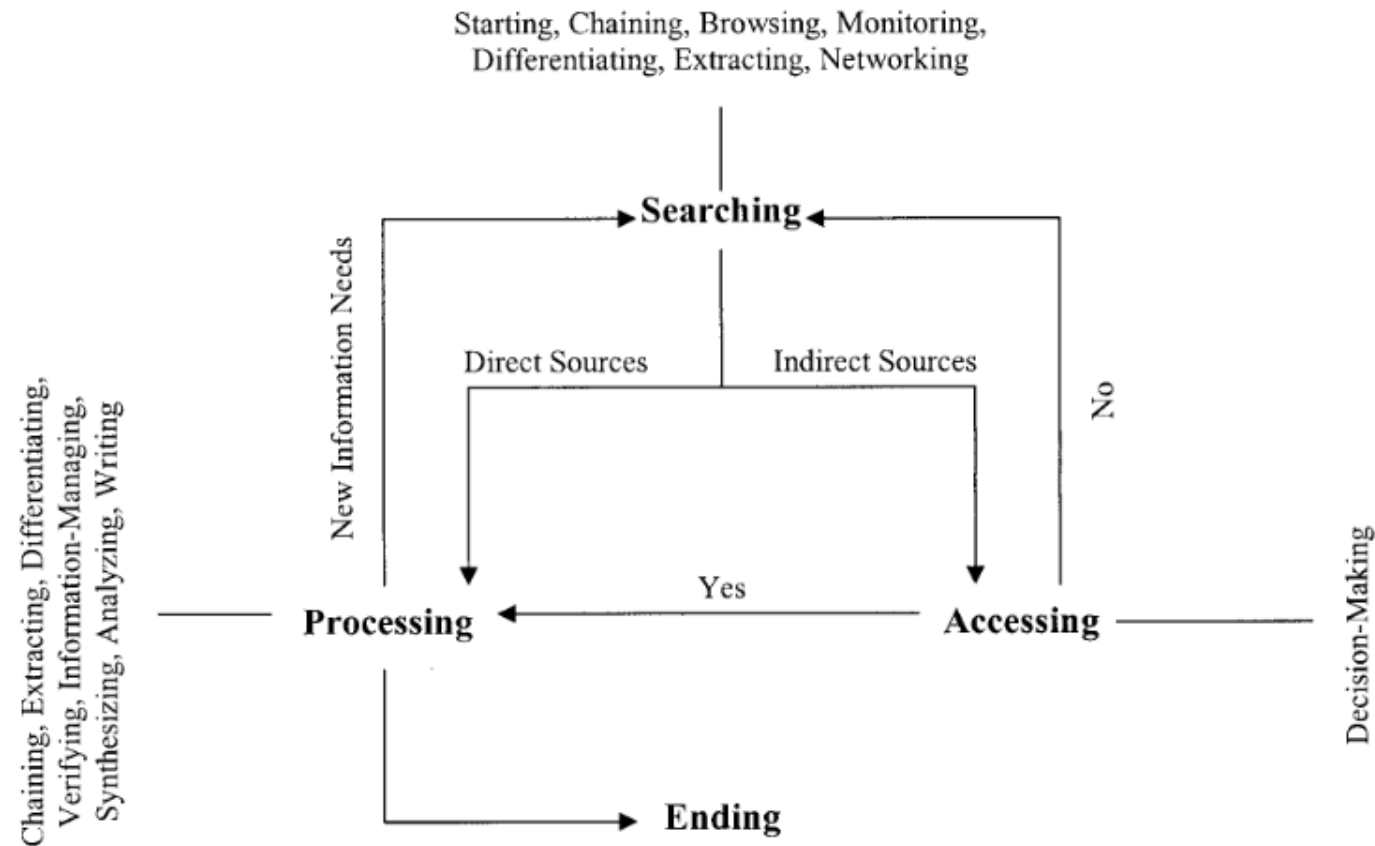

Digital Libraries

Data Repositories

...

Ellis' extended Information Seeking Model by Meho & Tibbo (2003)

Meho, L. I., & Tibbo, H. R. (2003). Modeling the information-seeking behavior of social scientists: Ellis's study revisited. *Journal of the American society for Information Science and Technology*, 54(6), 570-587.

Information Seeking vs. Information Retrieval

Why is it important to understand information-seeking behavior?

... to make our users happy!

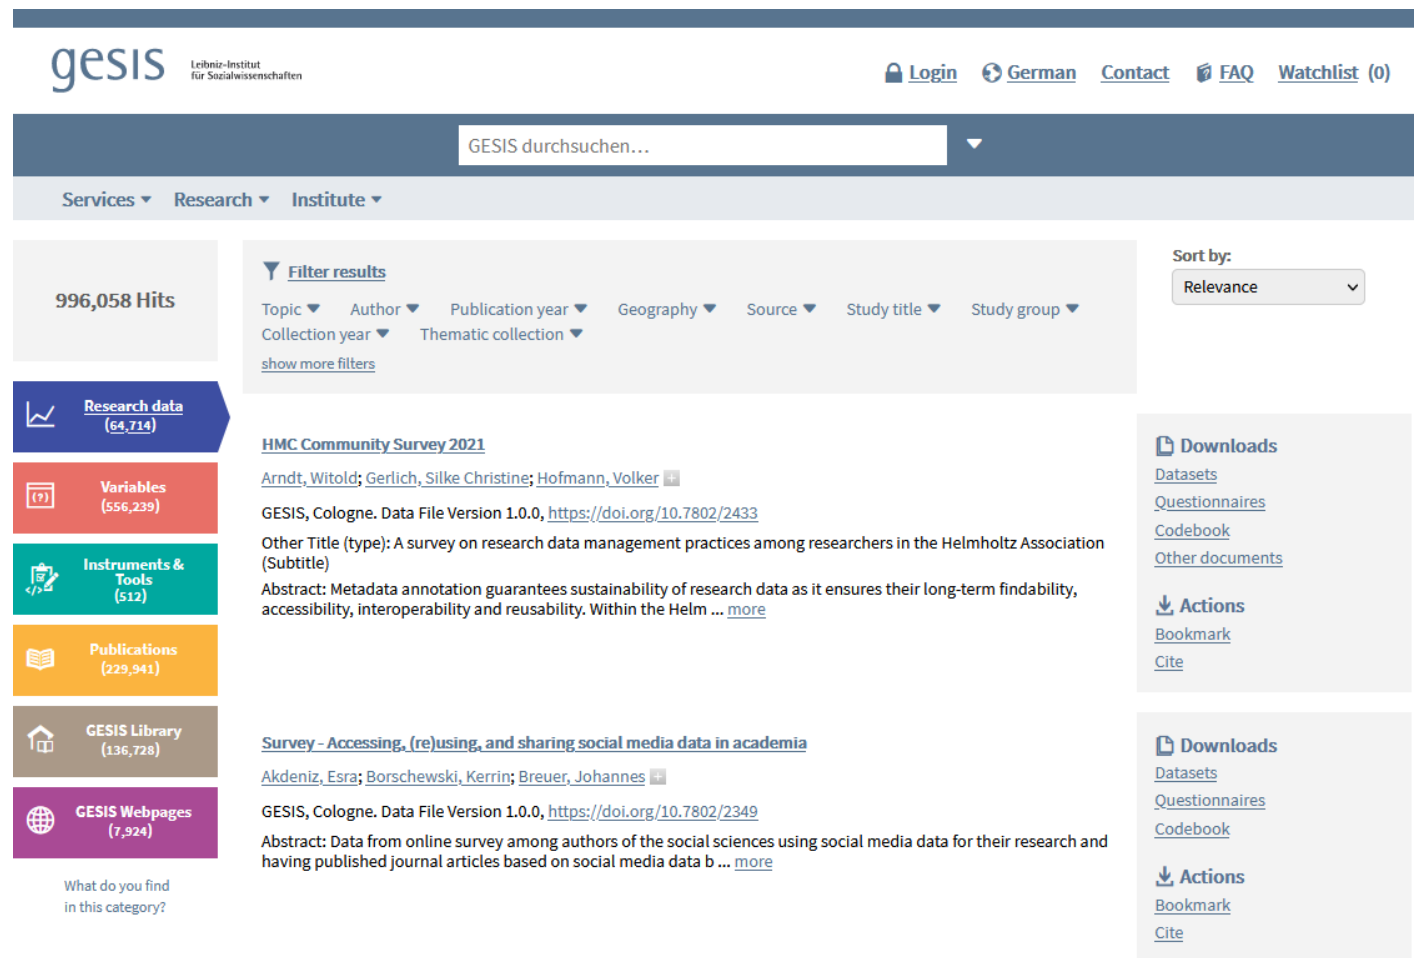

... to improve our digital services

GESIS Search

<https://search.gesis.org>

Meet the Experts – 14.03.2024
Searching the Social Sciences
with GESIS Search

The screenshot shows the GESIS Search homepage. At the top, there is a navigation bar with the GESIS logo, Leibniz-Institut für Sozialwissenschaften, and links for Login, German, Contact, FAQ, and Watchlist (0). Below this is a search bar containing the text "GESIS durchsuchen...". A secondary navigation bar includes "Services", "Research", and "Institute".

The main content area displays search results for "996,058 Hits". On the left, there is a vertical sidebar with categories: Research data (64,714), Variables (556,239), Instruments & Tools (512), Publications (229,941), GESIS Library (136,728), and GESIS Webpages (7,924). Below these is a question: "What do you find in this category?".

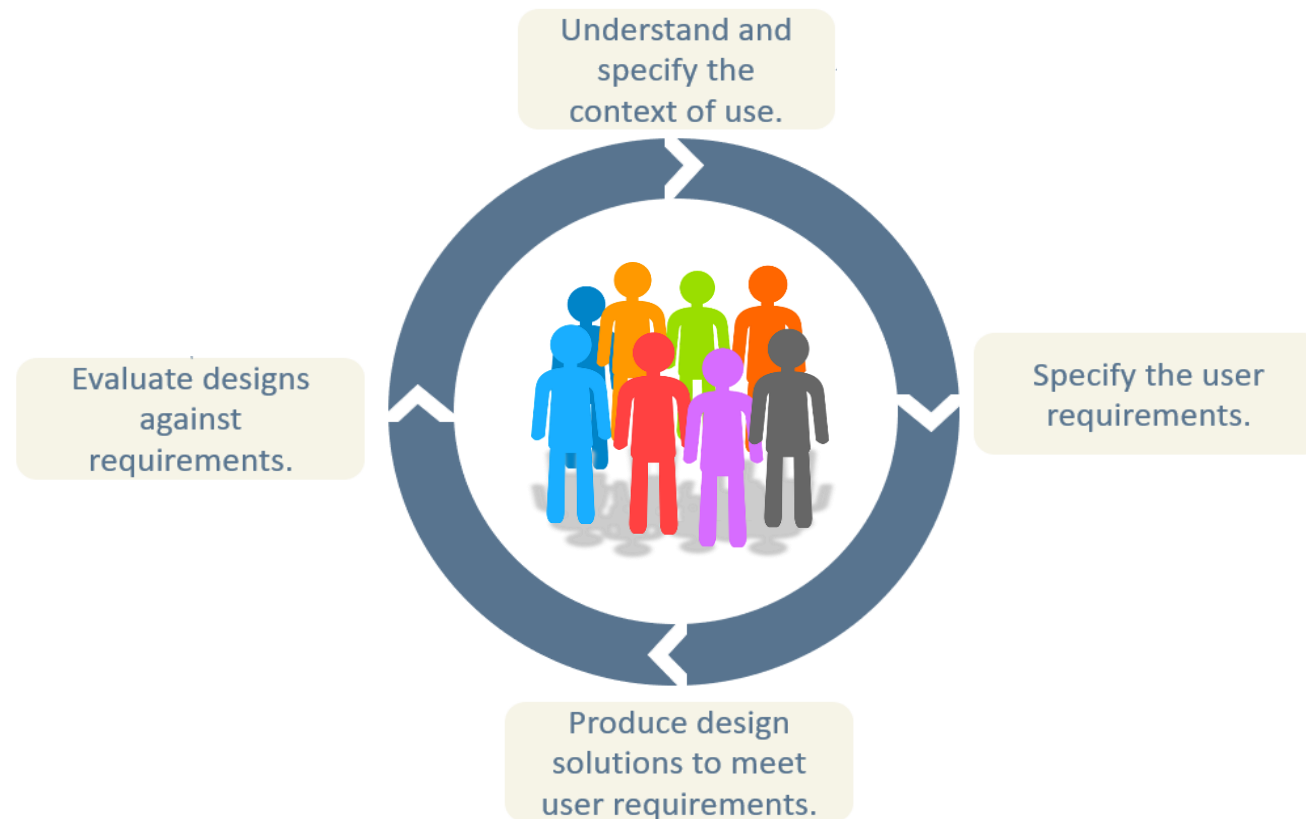

The main results area features a "Filter results" section with dropdown menus for Topic, Author, Publication year, Geography, Source, Study title, Study group, Collection year, and Thematic collection. A "Sort by:" dropdown is set to "Relevance".

Two search results are visible:

- HMC Community Survey 2021**
Arndt, Witold; Gerlich, Silke Christine; Hofmann, Volker
GESIS, Cologne. Data File Version 1.0.0, <https://doi.org/10.7802/2433>
Other Title (type): A survey on research data management practices among researchers in the Helmholtz Association (Subtitle)
Abstract: Metadata annotation guarantees sustainability of research data as it ensures their long-term findability, accessibility, interoperability and reusability. Within the Helm ... [more](#)
- Survey - Accessing, (re)using, and sharing social media data in academia**
Akdeniz, Esra; Borschewski, Kerrin; Breuer, Johannes
GESIS, Cologne. Data File Version 1.0.0, <https://doi.org/10.7802/2349>
Abstract: Data from online survey among authors of the social sciences using social media data for their research and having published journal articles based on social media data b ... [more](#)

On the right side, there are two "Downloads" sections, each with links for Datasets, Questionnaires, Codebook, and Other documents, and an "Actions" section with links for Bookmark and Cite.

Information-Seeking behavior research as part of the User-Centered design process

How to research information-seeking behavior?

Research Methods

- Diary study
- Questionnaires
- Log-file Analysis
- Interviews
- Observations

Research Methods

- **Diary Study**
- Questionnaires
- Log-file Analysis
- Interviews
- Observations

Diary study @ GESIS (1)

- 12 German Social Science researchers (5 female, 7 male)
 - Task: Protocol information needs over a period of two weeks and provide information about the approach you used to meet the information need
- 54 individual statements

Diary study @ GESIS (2)

Outcome: Categories of information needs

- Literature
- Research data
- Variables in research data
- Support for data analysis
- ...

Research Methods

- Diary Study
- **Questionnaires**
- Log-file Analysis
- Interviews
- Observations

Online Questionnaire @ GESIS (1)

- 337 participants German Social Science researchers (Professors, Postdocs, PhD students)
 - Task 1: “Check each of the 9 statements that corresponds to your own information need.”
 - Task 2: “If you're thinking about the last week, what information were you looking for in the context of your scientific work?”
- 331 information needs

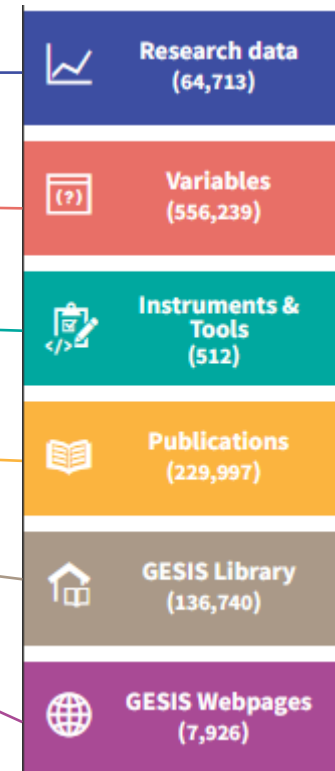

Online Questionnaire @ GESIS – Results Task 1

I'm looking for	Number (n=337)	Category
... literature on a specific topic.	293	Literature
... for full texts, which I can download directly.	287	Literature
... national and/or international research data.	216	Research data
... social science items and scales to create a questionnaire.	171	Measurement instruments
... information about which variables are contained in certain research data.	163	Variables in research data
... for clues as to whether certain research data are suitable for answering my research question.	159	Research data
... variables collected in various studies to compare them.	154	Variables in research data
... research data mentioned in a paper.	134	Research data
... for cooperation partners for a research project.	62	Networking / Cooperation

Online Questionnaire @ GESIS – Results Task 2

Outcome: Categories of information needs and use cases

- Research data
- Variables
- Support for data analysis
- Literature

Research Methods

- Diary Study
- Questionnaires
- **Log-file Analysis**
- Interviews
- Observations

Log File Analysis – GESIS Search

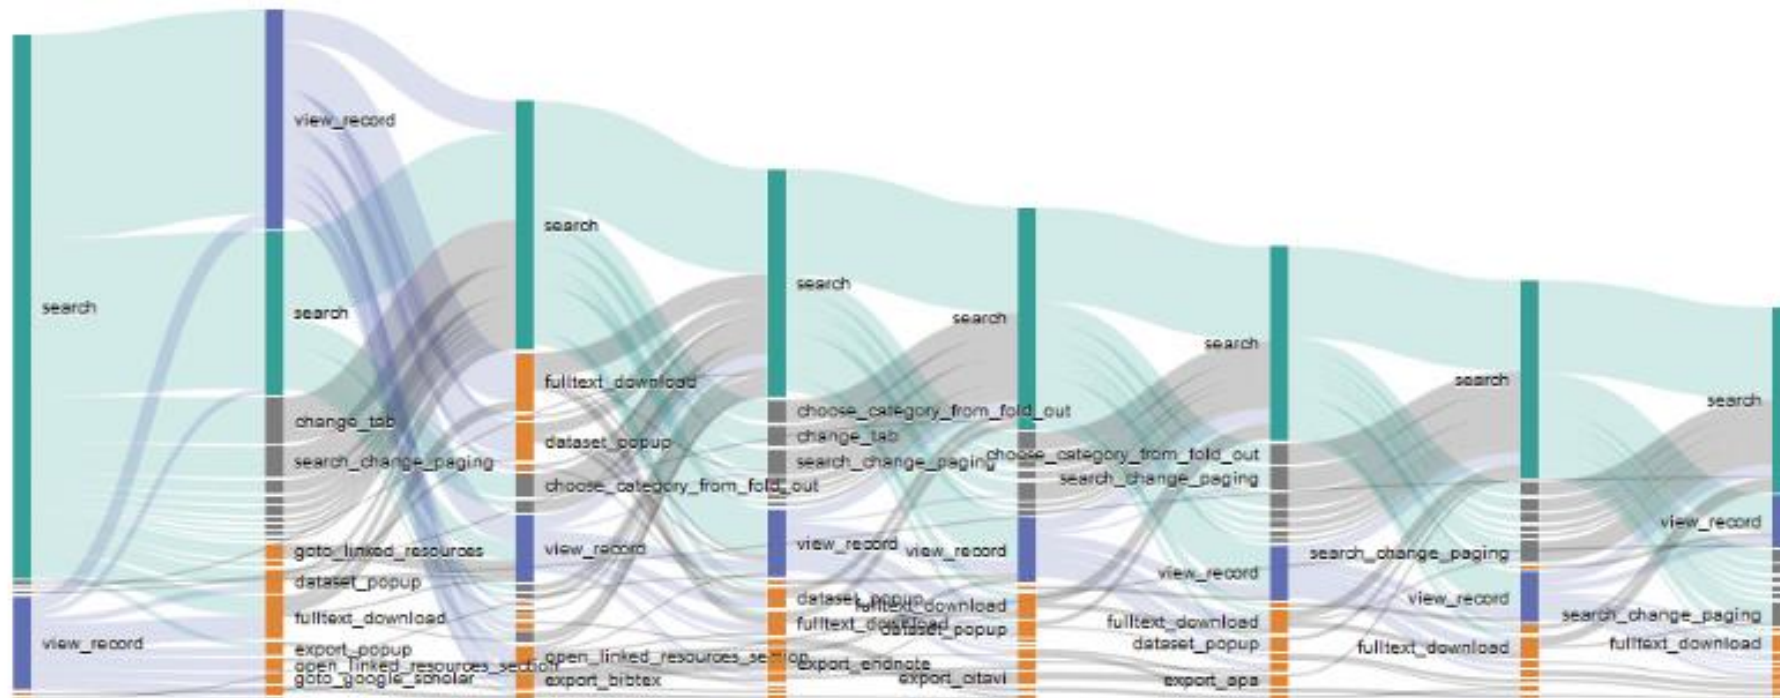

Figure 6: First eight user actions in n=6,812 sessions with positive actions. Search actions in green, view_record actions in blue, positive signals in orange, other actions in grey.

Hienert, D., Kern, D., Boland, K., Zapilko, B., & Mutschke, P. (2019, June). A digital library for research data and related information in the social sciences. In *2019 ACM/IEEE Joint Conference on Digital Libraries (JCDL)* (pp. 148-157). IEEE.

Research Methods

- Diary Study
- Questionnaires
- Log-file Analysis
- **Interviews**
- Observations

Research Methods

- Surveys
- Diary
- Log-file Analysis
- Interviews
- **Observations**

Observational study @ GESIS (1)

- Focus on Dataset search
- 12 Social Scientists
- Observations at their workplaces
- Task: “In the context of your research, you need research data. For today, you decide to start with the search for research data.”

Observational study @ GESIS (3)

• Key finding

- Literature search is an important part of dataset search.
- Tools are unknown
- Tools are creatively misused
- Relevance assessment is very complex
- Accessibility to datasets is limited
- Dataset search suffers from missing interlinks
- Dataset search literacy is low

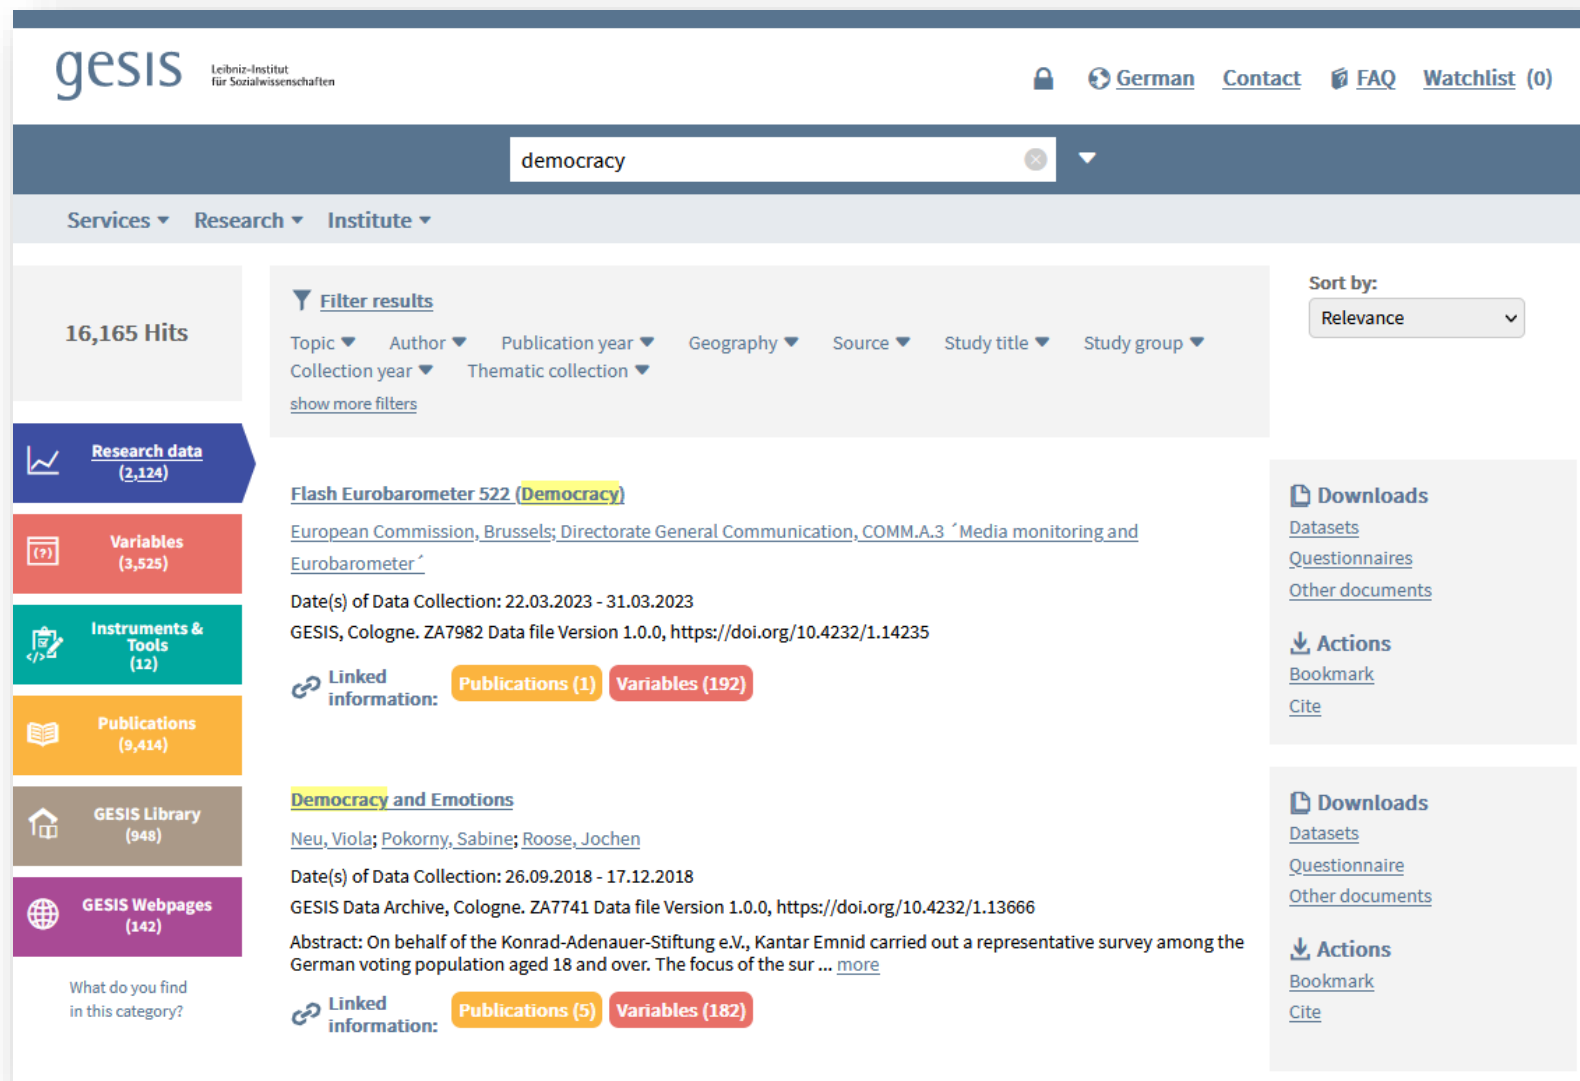

Meet the Experts – 15.02.2024
**Five Ways to Turn your Dataset
into Click Bait**

What do we do with
the knowledge about
information-seeking
behavior?

... derive requirements for the GESIS Search and other digital GESIS products

Meet the Experts – 11.04.2024
How knowledge graphs can help to share research data and information

The screenshot shows the gesis search results page for the query 'democracy'. The page features a search bar at the top with the query 'democracy' and a search button. Below the search bar, there are navigation links for 'Services', 'Research', and 'Institute'. The main content area displays '16,165 Hits' and a 'Filter results' section with various filters such as 'Topic', 'Author', 'Publication year', 'Geography', 'Source', 'Study title', 'Study group', 'Collection year', and 'Thematic collection'. Two search results are visible: 'Flash Eurobarometer 522 (Democracy)' and 'Democracy and Emotions'. Each result includes a title, a brief description, the date of data collection, and a link to the data file. The 'Flash Eurobarometer 522' result shows 1 publication and 192 variables, while the 'Democracy and Emotions' result shows 5 publications and 182 variables. On the right side, there are sections for 'Downloads' (Datasets, Questionnaires, Other documents) and 'Actions' (Bookmark, Cite).

Will information-
seeking behavior
change?

- Natural Language Search
- Conversational Search

Genuine information need of social scientist (1)

- Online-Survey (72 Social Scientists)
- Task 1: “For answering your current research question, you need quantitative data. You have already searched for data but did not find a suitable dataset yet. You meet a colleague in the coffee corner. You know that your colleague has a great overview of your research topic. You tell her about your struggle to find relevant data. Your colleague offers help and asks you to describe exactly what data or variables you are looking for.”

Genuine information need of social scientist (2)

Request: “I am looking for representative surveys of the population that collects the personal attitudes towards democratic principles.”

Request: “I am looking for data on occupational and financial consequences of the corona crisis on older workers.”

Take away message

Information seeking behavior is about **people** and the **processes** they use when seeking information. There are research methods helping us to understand the processes in order to provide support systems that are a pleasure to use.

The people, behaviors, processes, systems, and information involved are **constantly changing** and adapting, but one thing remains the same: we'll always want information to make sense of the world.

Expert contact & GESIS consulting

Contact: you can reach the speaker via e-mail:
dagmar.kern@gesis.org

GESIS Consulting: GESIS offers individual consulting in a number of areas – including survey design & methodology, data archiving, digital behavioral data & computational social science – and across the research data cycle.

Please visit our website www.gesis.org for more [detailed information](#) on available services and terms.

Upcoming talks

- 15.02.2024: Five ways to turn your dataset into click bait
- 14.03.2024: Searching the social sciences with GESIS Search
- 11.04.2024: How knowledge graphs can help you to share research data and information
- 16.05.2024: Opportunities and challenges of Large Language Models for the social sciences
- 13.06.2024: Preserving and analysing large-scale Twitter data
- 11.07.2024: Introduction to scholarly information extraction

- Please visit our meet-the-experts website:
- <https://www.gesis.org/en/services/sharing-knowledge/consulting-and-guidelines/meet-the-experts>

Thank you for participating!
